RECORDING TRANSACTIONS

Ledger and Trial Balance

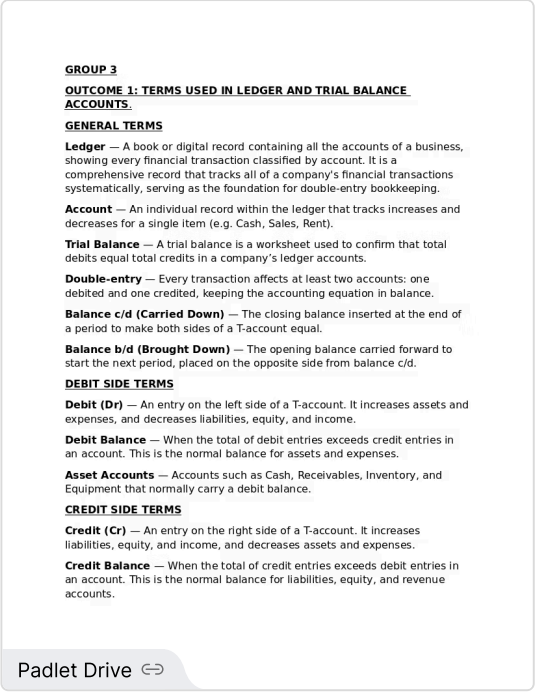
Group 3 Members

1. Maluki Mutuku 20226BS171255
2. Lilian Muthoni 2026BS171771
3. Sharon Kibaara 2026BS171934
4. Brigit Nafula 2026BS172484
5. Kiptoo J. Faith 2026S170790
6. Mokaya Agnes 2026BS171775

Learning outcomes

By the end of this presentation, trainees should be able to:

1. Define the terms used in ledger and trial balance accounts.
2. Balance ledger accounts.
3. Balance accurately and transfer to a trial balance sheet.
4. Ensure the sum of debits is equal to the sum of credits.
5. Identify and correct any errors in the trial balance.



GROUP 3

OUTCOME 1: TERMS USED IN LEDGER AND TRIAL BALANCE ACCOUNTS.

GENERAL TERMS

Ledger — A book or digital record containing all the accounts of a business, showing every financial transaction classified by account. It is a comprehensive record that tracks all of a company's financial transactions systematically, serving as the foundation for double-entry bookkeeping.

Account — An individual record within the ledger that tracks increases and decreases for a single item (e.g. Cash, Sales, Rent).

Trial Balance — A trial balance is a worksheet used to confirm that total debits equal total credits in a company's ledger accounts.

Double-entry — Every transaction affects at least two accounts: one debited and one credited, keeping the accounting equation in balance.

Balance c/d (Carried Down) — The closing balance inserted at the end of a period to make both sides of a T-account equal.

Balance b/d (Brought Down) — The opening balance carried forward to start the next period, placed on the opposite side from balance c/d.

DEBIT SIDE TERMS

Debit (Dr) — An entry on the left side of a T-account. It increases assets and expenses, and decreases liabilities, equity, and income.

Debit Balance — When the total of debit entries exceeds credit entries in an account. This is the normal balance for assets and expenses.

Asset Accounts — Accounts such as Cash, Receivables, Inventory, and Equipment that normally carry a debit balance.

CREDIT SIDE TERMS

Credit (Cr) — An entry on the right side of a T-account. It increases liabilities, equity, and income, and decreases assets and expenses.

Credit Balance — When the total of credit entries exceeds debit entries in an account. This is the normal balance for liabilities, equity, and revenue accounts.
